WARNER IRIS GARDENS

GRANDVIEW, WASHINGTON

GREETINGS to our friends and customers who have had our catalogs in the past, and thank you for the business. It has been pleasant and profitable.

To those who are receiving our catalog for the first time, we are pleased to show you what we have to offer and hope you may find what you want.

We replant our gardens every year to give the plants plenty of room and plant food and so we can grow very fine rhizomes. The climate and soil of the Yakima Valley are very favorable for the growing of tall bearded iris and we feel sure you will be pleased with our fine Washington grown iris.

Since you are a lover of iris, may we suggest that you join The American Iris Society, membership in which will bring you four meaty bulletins per year. These bulletins are really books of a hundred pages or more filled to the brim with articles on iris culture, garden planting, awards, varietal comments, questions and answers and news of iris activities everywhere. The dues are only \$3.50 per year. Send your remittance to: The American Iris Society, 444 Chestnut Street, Nashville, Tennessee.

THE IRIS—AN IDEAL HARDY PERENNIAL

A big 226 page book packed with iris lore, this interesting book written by sixteen outstanding experts, will add to your enjoyment of iris growing. For the fancier, there is the botanical background of the iris family, a chapter on genetics, the mechanics of pollination, and suggestions on hybridizing. For everyone there are notes on disease and pest control, flower photography, Dykes Medal irises and many valuable lists of the better varieties. Well illustrated.
